

Gabeldichtungen von ARIETE heben sich von allen anderen marktüblichen Gabeldichtungen durch die außergewöhnliche Qualität des Werkstoffes ab, aus dem sie hergestellt werden: das Karboxylelastomer XNBR. Dieses Gemisch weist hervorragende Abriebbeständigkeit, Temperaturbeständigkeit und Beständigkeit gegenüber den Ölen und Zusätzen auf, die bei modernen Gabeln zum Einsatz kommen. Der normale Nitrilgummi NBR, der in der Regel von allen Dichtungsherstellern eingesetzt wird, stellt eine mittelmäßige, wirtschaftlich bedingte Wahl dar. Die technischen Mitarbeiter von ARIETE haben nach grundlegenden Untersuchungen, Experimenten und mit der Erfahrung, die die Firma im Laufe ihrer fünfzigjährigen Tätigkeit gesammelt hat, für diese Dichtungen das Karboxylelastomer XNBR eingeführt, das gegenüber dem herkömmlichen NBR folgende Vorzüge bietet: Dank der hochentwickelten Produktionstechnologien von ARIETE können, obwohl der Werkstoff XNBR fast das Doppelte kostet, wettbewerbsfähige Preise erzielt werden.
